

ST Adapters

Used for accurately mating two connectors, these adapters are suitable for all applications including LAN, FTTx and Telecom. These metal bodied adapters are secured with a nut and washer and will fit into a 'D hole' cut out. The 'D hole' stops the adapter from turning ensuring a good fixing with the bulkhead. ST adapters are available as Singlemode or multimode and have ceramic alignment sleeves for improved accuracy.

As standard the adapter is a simplex construction, however they can be supplied as a duplex style which would fit into a standard SC duplex footprint. Typical 500 insertions.

<u>Part Number</u>	<u>Description</u>
AD-ST-MM	ST SIMPLEX MULTIMODE
AD-ST-SM	ST SIMPLEX SINGLEMODE
AD-ST-DX-MM	ST DUPLEX MULTIMODE (SC DX FOOTPRINT)
AD-ST-DX-SM	ST DUPLEX SINGLEMODE (SC DX FOOTPRINT)
